### **FFAC IWG Purpose & Vision Statement:**

“The IWG is focused on supporting landscape-scale, active restoration of federal forest lands by identifying and removing barriers to restoration of forest and watershed health.

We will:

1. help collaboratives identify local forest health priorities, develop landscape-scale forest restoration plans, and find agreement for active management;
2. advocate for sustainable and predictable supply of biomass and merchantable timber, and
3. advocate for supportive state and federal policy.

These activities will restore forests, help sustain communities by creating jobs and maintaining forest-sector infrastructure, and enhance Oregon’s energy independence. The IWG will initially focus on the dry, fire-prone forests found east of the Cascades and in the southern interior of Oregon.”
