

Declaration of Cooperation

Prairie City Sustainable School Project

I. Introduction

Partners in this project include citizens, local organizations and businesses, school employees and board members and government agencies. All partners in this project have come together with the common interest of creating an attractive, useful and sustainable school buildings and grounds which include sports fields which will benefit the students and their families, the community of Prairie City, and athletes from around the greater Eastern Oregon area.

In a rural community such as Prairie City, the local school is a large part of its identity. The Prairie City School serves roughly 200 students in grades kindergarten through twelve. In addition to school events, many community and regional events take place on the school sports fields. The people of Prairie City take pride in their school, but with budget cuts and local unemployment rates, many people have moved away, leaving the school population smaller and with less money. The buildings are in need of paint and there is a need for landscaping. The sports fields, including a baseball field, a football field and a little league baseball field are suffering because of water shortage and the sand base track is in disrepair with mud holes and uneven edges.

This community has shown great effort to regain stability with groups such as the Prairie City Community Association which sponsors many events and community projects and the Prairie City Athletic Complex group has worked hard to raise funds and donations of expertise labor and equipment toward the renovation of the Track and sports fields which would enable Prairie City School to host district events. These community organizations are working together with the Governor's Oregon Solutions Program's team for the Prairie City Beautification Project toward the common goal of improving the school for the community and its youth. The Prairie City Beautification Project will enhance projects and organizations already in place.

The following sections of this Declaration of Cooperation outline the elements of this collaborative project and detail the individual commitments made by participants of the Oregon Solutions team.

II. Projects for the Sustainable Beautification of Prairie City School

A. Paint School Buildings

One of the beautification projects that this Oregon Solutions team will undertake is to paint the school buildings for Prairie City School. This project was chosen because the outward appearance of the school would be significantly improved by simply unifying the color scheme of the campuses buildings. We believe that this, in turn, will help to boost community pride in our school and will make future paint maintenance easier by creating a palate to work from.

A paint scheme has been chosen keeping the most recently painted building, the new gym, in mind. The colors on this building are pleasant and there are coordinating colors throughout the school and on the Metro Paint palate. This will enable the paint committee to reduce costs because some surfaces will not need paint. The colors will be a light taupe with a dusty green trim.

The paint on some surfaces is chipping and on others the colors are old and faded. There is little continuity to the colors on different parts of the building and this team will seek to coordinate new paint colors with some of the existing colors and bring the color scheme together. The Paint Committee will consider input from the school's students.

Elementary School and old gym.

New gym with chosen color scheme.

Bates Building, bright colors and old paint.

High School Addition, faded, old paint.

After researching paint methods the team chose to write a grant for the cost of the Professional Contractor to do the prep work, priming and painting on hard to reach or difficult to paint areas on the buildings. It made sense to try this first because volunteers without adequate training would not know how to prep correctly and it would jeopardize the sustainability of the paint.

The paint that the team will use is Metro Paint. Metro Paint is recycled paint and has been used on many government and private buildings over the years. It has been proven to be sustainable and is in agreement with this team's effort to be environmentally conscious because it is 100% recycled paint. Metro Paint will be purchased at a government rate of \$12.00 per five gallon bucket and will be delivered from the Portland area to Prairie City by one of the team participants or donated transport by Eastern Oregon Fast Freight in order to save shipping costs.

On the advice of Metro Paint Office, we will seek to use a high grade primer on the metal and bare wood surfaces before applying Metro Paints to ensure the sustainability of the paint. Our paint contractor, Les Church has recommended Sherwin Williams Primer and has obtained the primer at a discount and will sell it to the school at his cost. The Paint Committee will also write a letter requesting a donation of primer from the Sherwin Williams store in Redmond, Oregon.

The Paint Committee will seek donated equipment such as lifts, ladders and paint sprayers. The team will seek to purchase any needed equipment , such as brushes, rollers and drop clothes, locally whenever possible.

The Paint Committee and Alumni Committee will work together to seek volunteer labor groups. The possibility of hiring a prison Work Crew has also been considered for part of the labor but would have to be done during the Summer when students are not present. A Prison Work Crew would cost the project approximately \$400.00 a day for a ten man crew.

The Prairie City Sustainable School Paint Committee will seek to fund this project by writing a grant to the Meyer Memorial Trust and by working with the school to use the available funds from the school budget. The Paint Committee will also seek donated materials from various sources and will work together with the Alumni Committee to secure alumni funds needed to help meet the amount of money needed to complete this task.

Update: July 2005

The paint committee has settled on the paint from Metro Paints. We can buy this paint at a reduced cost because it is for a school and it is recycled paint. The committee has chosen light brown for the walls and a barn red color for the trim to coordinate with the bricks.

The committee will use the \$1700.00 from the Alumni Fund to purchase paint and supplies. A good primer will be purchased from a local business. The committee is interested in using part of the money to purchase a pressure washer for the school.

The Powder River Correctional Institution in Baker City can supply 12 man work crews at a low cost for 8 hour work days. The money for the alumni fund could pay for at least one day of this crew and the Project members may vote to use an additional \$2,000 donated by the Greater Prairie City Community Association for this paint project.

Focus for paint will now be on the Old High School and the Elementary. Historic Preservation will be pursued for the Old Gym and because the Bates Building's future is up in the air, we will wait to see what happens before we start to plan for that building.

An additional idea for a couple of murals has been thrown out and a grant may be written to the Oregon Fine Arts Commission for that part of the project. Toni Morganson, a team member and an Art teacher at the school would work with students to create these murals. She has painted murals in the downtown area of Prairie City and murals on the school would tie the downtown and the school together.

B. Landscaping

Another beautification project within this Oregon Solutions Project will seek to create an attractive appearance to the grounds surrounding the school buildings by planting native, drought resistant vegetation that will be sustainable and easily maintained.

Over the years, many of the plants around the Prairie City School have either died because of lack of water, or have been pulled out because of the difficulty to maintain them.

The Landscape Committee will use a scale map of the grounds and decide upon which places around the school would both benefit from and support vegetation. They would decide which plants will do better in each area. This committee will work together with the students of Prairie City High School in planning and landscaping the school grounds.

The Landscape Committee will identify areas in which a drip irrigation system will be necessary in order for the landscaping to be sustainable. The drip irrigation system will be installed in conjunction with the Agriculture Class and will serve as a learning experience for these students.

Plants may be purchased from local nurseries or may be transplanted from local Forest lands with a Forest Service Transplant permit. The Oregon Solutions team will be seeking grants that can be written to pay for purchases of plants and materials for the drip irrigation system. The grants may also pay for the expertise needed to plan and install this drip system.

The Landscape Committee will seek donated equipment and Volunteer labor will be sought in conjunction with the Agriculture Class and the Alumni Committee.

Update: July 2005

The Landscape committee has created a map and plan for landscaping the school grounds. A variety of trees and shrubs as well as some flowering plants have been chosen from a list provided by a local gardening club (The Green Thumb Garden Club). By having a wide variety of plants and trees, the landscape can be used in Science classes for plant identification. Plants will be purchased through a local nursery that has offered a discount.

A grant was written to the Hardy Plant Society of Oregon in January and the money was granted in March. These funds will cover all plant costs. Top soil was donated by the Clyde Holliday Ranch and transportation for soil was donated by local truck drivers. This soil will be shared with the Track Project.

In May, the Prairie City High School Student Council voted to donate the money for purchasing materials to create a drip system to ensure the sustainability of planted trees

and shrubs. The FFA and Agriculture classes will participate in putting the drip system in. Members have prepped the two flower beds and planting should happen in late July, early August. Hardy Plant Society Grant to be attached to this DOC.

B. Track Surface

This Oregon Solutions team will work together with the Prairie City Athletic Complex to create an attractive and sustainable sports field and track surface. Prairie City School has not been able to hold track meets for many years due to the condition of the old sand track surface.

In order to prepare the current track area for a new track surface, the current football field will be moved and improved as well. The field will be evened out and will be seeded in grass which will need less water which is in agreement with this teams desire to conserve water while creating sustainable sports fields for the school.

The Team and the PCAC will seek to use Nike Tread which is a track surface made from recycled shoes. This surface will meet the environmentally conscious standards of this tem while being both sustainable attractive.

Through the past efforts of the Prairie City Athletic Complex, money has been raised and a promise of funds from the Room Tax has been obtained. Much of the engineer expertise, excavation and contractor hours has been donated, creating part of the matching funds needed to apply for a Nike, Bowerman Trust Fund Grant to pay for the track surface. Additional funds will be sought from grants such as the Oregon Community Foundation and the Ford Family Trust.

Update: July 2005

The PCAC has continued to fundraise and obtain support and donations of materials and labor. In the Fall of 2004, the PCAC obtained the donation of all topsoil needed for the project from the Holliday Ranch. Transportation of this soil was donated by many local truckers and the fuel for trucks was donated by a local gas station. Fundraising events have included sweatshirt sales, The Strawberry Mountain Relay each spring and various letters seeking support from local and statewide businesses. In January of 2005, the local Les Schwab store sent in a \$1,000 donation for the project.

In the Spring of 2004, the Bowerman Trust Fund Grant written for this project was denied because it is a small market area. Though this lowered spirits of many, the fund raising has continued.

A letter of enquiry was sent in during the winter of 2005 to the Ford Family Foundation. An invitation to write a grant for \$50,000 was sent to the project in February and the final grant was sent in in June of 2005. We are hopeful that this grant will be funded.

The total cost of this project will be around \$250,000 and if the grant from Ford Family is funded, we will be short \$35,000. We still need to find donations of Concrete and the work for the concrete. Letters seeking this support will go out in July of 2005.

D. Cyclone Fencing

The Oregon Solutions team will seek to research the need for fences around sports fields. The fencing will have openings around the perimeter in order to keep an inviting atmosphere to community and people seeking to use them, but will protect the fields by deterring vandalism and motor vehicle use on the fields and new track surface.

There are three fields in need of fencing: The Little League Field, to the south of the track area, The Track area, and the Baseball Field. The Oregon Solutions team will identify types of fences appropriate for each area and will identify key places to create openings and gates for vehicle access in the fences. Fences height and design will consider both field uses and current sport viewing areas.

Grant funds will be sought to support this project.

Research is being done on this project.

E. Water Source

Prairie City School currently has three separate water rights, which enable them to water the sports fields and grounds from April first until September 31st. This water has not been sufficient to keep the fields green in the past. There has been some sabotage of the school's watering equipment and to the irrigation ditch which has created even more of a shortage for the school.

The use of city water is not cost effective for the school, as city water rates have gone up significantly in the recent past.

Prairie City School wished to look beyond the current water rights and the use of city water to other options. A water source committee will seek other options suggested by Kelly Rise, the Water Master. These options include donated water rights from a ranch or organization, and/or a well. The depth of the well depends on the prior.

This is a difficult issue and the Oregon Solutions team will seek to remain open-minded and continue to work toward a resolution.

Update: July 2005

The Water Committee actively met several times. The idea for a deep well shared with the city has come up many times and seems to be the best option at this point. The city is still researching potential sites and is communicating with Kevin Purnell about this issue.

F. Alumni Fund

The Alumni Committee formed in order to find support from former students and teachers. The committee will send letters and updates. The funds will be allocated to worthwhile projects and we will try to meet the needs of the Prairie City School as they come up.

Update: July 2005

The Alumni Committee has sent out three letters, two in 2003 and one in 2004. Donations of over \$1800.00 have been received and we now have over 400 addresses. One alumni has donated over \$12,000 worth of computers to the school through an employee match program at his work at IBM. (cost to this alumni was just over \$2,00.). The Alumni committee may sponsor a future dance/concert.

III. Labor

Labor for the individual projects within this Oregon Solutions projects will be mostly volunteer. The Oregon Solutions team will work in conjunction with the Prairie City Community Association and the Alumni Fund Committee to seek citizens and past citizens who are interested in participating in work parties.

Individual projects will seek professional expertise, labor and equipment at a reduced cost or donated. The donations of professional expertise, labor and equipment will be tax deductible to the businesses providing these.

When needed, the Oregon Solutions team will consider using prison work crews from the Powder River Correctional Facility in Baker City. This will be at a cost of \$400.00 per day plus travel expenses. The crews consist of ten men and a guard and will provide this project with the opportunity to make sure labor is available when needed.

Update: July 2005

Some of the volunteer labor for projects has been by students themselves. This is important because it helps them take ownership in their school. The local garden club volunteered expertise for the landscape project. Paint labor may be volunteer as well as work crews from the Powder River Correctional Institution.

IV. Funding

Funding for this project will come in many different ways. This project will seek to find funding for projects while also finding ways to create a sustainable funding source through the Alumni Fund Committee.

A. Fund Raising

Many funds are already in place for the track project. This project is part of a long term project being managed by the Prairie City Athletic Complex Committee. These funds are part of their ongoing project and will be for the Track Surface only.

Funds are being raised through the Prairie City School Alumni Fund Committee. These funds will be designated to individual projects as needed and through the agreement of the committee members.

Update: July 2005

Most support has been from letters seeking support and tshirt and sweatshirt sales. The Track Committee also sponsors annual events such as the Strawberry Mountain Relay.

B. Grants

Grants for the projects within this Oregon Solutions Project will be considered. Grants will be researched and appropriate grants will be chosen for each project. The League of Oregon Cities will work together with interested team members in the grant writing process, enabling this project to submit quality grant proposals that coordinate the individual project funding and meet the needs of the project as a whole.

Update: July 2005

Landscape Grant: Hardy Plant Society, funded.

Paint: Meyer Memorial Trust Fund grant, denied

Track: Bowerman Trust Fund Grant, denied

Ford Family Fund Grant, being considered.

C. Donations

Donations of equipment and labor will be considered as part of the budget for the projects.

V. Implementation

The implementation of each individual project will have its own time line. Grants will be written with the time line in mind, so that funds are available when team members require them.

Implementation of each project will be carried out after consultation with the Superintendent of Prairie City School, Kevin Purnell, and will consider the school schedule and needs of students.

Whenever possible, the implementation of these projects will incorporate the assistance of students of the school in order to instill pride and a sense of accomplishment in its students.

Parts of this project will be ongoing and will reach beyond the timeline of this project.

Update: July 2005

These projects are still ongoing. Some future ideas include a fund raising dance/concert, continued letters for Alumni, updating and seeking support, and Grant Writing.

Jeff Fields, Nature Conservancy:

Will attend meetings and will give professional advice. Will help brainstorm possibilities.

Signed Jeff Fields date 7/20/04

Sharon Fritsch:

Will serve as volunteer facilitator for the Oregon Solutions Program's Prairie City Beautification Project. Will serve on the Alumni Fund Committee. Will serve as volunteer labor when needed. Will write grants as needed. Will transport paint from Metro Paints to Prairie City School. Will Create a Declaration of Cooperation for this project. Will co-apply for funds.

Signed Sharon A. Fritsch date 7-26-04

Nathan Hughes, Prairie City School:

Will serve on the Water Source Committee. Will provide information about school maintenance and equipment when needed to all committees. Will help to ensure that all projects will have an easy maintenance plan in order to ensure project sustainability. Will co-apply for funds.

Signed Nathan Hughes date 7/26/04

Judy Jacobs:

Will serve on the paint committee. Will gather information and make phone calls. Will help to find a color scheme for the school buildings. Will seek writer for School Building History. Will attend meetings and help promote the effort through positive outreach.

Signed Judy Jacobs date 7/28/04

Julia Justice, Better Blooms:

Will attend meetings and provide expertise about plants. Will serve on the Landscape Committee. Will create price lists for plants chosen by Landscape Committee.

Signed

date

Debbie Letosky, Prairie City Community Association:

Will attend meetings when possible. Will help to brainstorm grant writing ideas. Will assist with the PCAC Track Committee. Will serve as liaison between Greater Prairie City Community Association and this project.

Debbie Letosky, PCAC Secretary 7-26-04
Signed date

Elaine Livran:

Will serve on the Track PCAC Committee. Will be committed to helping this project. Will be a part of "Restoring the Pride and Integrity of the Community and School". Will co-apply for funds.

Signed

date

Brenda Lovell:

Will serve on the Alumni Committee. Will post and mail letters when needed. Will support efforts of the project through positive outreach. Will help to gather alumni addresses and will help to coordinate Alumni meetings.

Brenda Lovell 7/27/04
Signed date

Dennis Lynch, Darlyn Nursery:

Will serve on the Landscape Committee. Will provide a map of the school grounds to show where plants will be planted and where drip system will be needed. Will provide plant expertise. Will attend meetings. Will co-apply for funds.

Dennis Lynch 7/26/04
Signed date

Ruth McPherren:

Will serve on Alumni Fund Committee. Will assist in facilitation of this Oregon Solutions Project. Will co-apply for funds. Will participate on Landscape Committee.

Ruth A. McPherren 7/26/04
Signed date

Jennie Messmer, League of Oregon Cities:

Will represent the League of Oregon Cities. Will serve as Grant Writer on this project. Will co-apply for funds on this project.

Signed date

Cheri Miller, Prairie City Athletic Complex:

Will serve on the Track PCAC Committee. Will assist in the writing of grants for this project. Will co-apply for funds.

Cheri Miller 8.10.04
Signed date

Sandy Murray, Convener:

Will convene meetings. Will serve as a liaison between team members and the Oregon Solutions Program. Will answer questions about projects when needed.

Sandy Murray 7.29.04
Signed date

Kevin Purnell, Superintendent, Prairie City School:

Will serve on the Paint Committee. Will act a recorder for this committee. Will help track down sources of expertise when needed. Will be part of labor force when needed.

Kelly Rise, Water Master:

Will assist Water Committee and will supply information needed for decisions regarding Water Source. Will attend meetings when possible.

Signed

date

Kristine Shull, U.S. Forest Service:

Will serve on the Landscaping Committee. Will assist in the identification of native plants, shrubs and vegetation which will do well in Prairie City's climate. Will serve as a liaison to the Forest Service for this project. Will co-apply for funds. Will help to identify grant resources for this project.

Kristine L. Shull
Signed

7/27/2004
date

Brent Smith, Conservation Area Manager, Confederated Tribes of Warm Springs:

Will serve on Water Source Committee. Will serve as liaison between Confederated Tribes of Warm Springs and this Oregon Solutions Project. Will provide information and expertise. Will attend Oregon Solutions meetings when possible.

Brent Smith
Signed

7/27/2004
date

Sarolta Sperry, Prairie City Community Association:

Will serve on Landscape Committee. Will serve as liaison between project and the Prairie City Community Association.

Sarolta Sperry
Signed

July 26, 2004
date

Jim Sullens, Prairie City Athletic Complex and Prairie City Fire Chief:

Will serve on the Track PCAC Committee. Will co-apply for funds. Will serve as liaison between Prairie City Fire Department and this project.

Jim Sullens 7-28-04
Signed date

Lynette Sullens, Prairie City Athletic Complex:

Will serve on the Track PCAC Committee. Will serve as secretary of the PCAC project. Will co-apply for funds.

Lynette Sullens 7/28/04
Signed date

Dennis Voigt, Prairie City Athletic Complex:

Will serve as co-chair of the Track, PCAC Committee. Will continue to pursue completion of the Track and Football field project. Will continue to help with fundraisers. Will co-apply for funds.

Dennis Voigt 8/6/04
Signed date

Tee Voigt, Prairie City Athletic Complex:

Will serve a co-chair of the Track PCAC committee. Will volunteer labor and time with the Prairie City Beautification Project. Will coordinate efforts of PCAC with efforts of the Oregon Solutions Project and will meet with the Grant Committee. Will co-apply for funds.

Tee Voigt 8/4/04
Signed date

Voigt Chevron, Local Business

Will donate fuel and hydraulic oil for Oxbow loader and other equipment for moving soil to new track site.

Signed

date

Wanda Voigt, Board Member, Prairie City School:

Will serve as chair person on Water Source Committee. Will serve as a liaison between this project and the Prairie City School Board. Will co-apply for funds.

Wanda Voigt

7/29/04

Signed

date

Margie Walton, Board Member, Prairie City School:

Will serve as chair person on the Landscaping Committee. Will serve on the Track PCAC Committee. Will serve as a liaison between the Prairie City School Board and this project. Will co-apply for funds.

Signed

date

Erika Watson, Prairie City School:

Will serve on the Landscaping Committee. Will serve as a liaison between this project and the students in the PCHS Agriculture Class. Will provide lists of plants. Will help create landscape plans. Will provide landscape plan books. Will monitor student help.

Erika Watson

7/26/04

Signed

date

Christie Winegar, Prairie City School:

Will Will serve as liaison between project and Winegar Construction. Will attend meetings when possible. Will co-apply for funds.

Christie L Winegar

7-28-04

Signed

date

Fred Winegar, Fred Winegar Excavating:

Will donate dump truck and operator for transport of top soil to football field.

Signed

date

George Winegar, Winegar Contruction:

Will donate percentage of bid to excavate current football field and follow engineer's plan to prep area for new track surface. Will donate dump truck and operator to transport topsoil to football field site. Will participate in Oregon Solutions Meetings.

 
Signed date

Layton Wyllie, Contractor:

Will donate dumptruck and operator to transport top soil to football field.

Signed

date

Kevin Zemmer, Captain, Snake River Correctional Institution:

Will...

Signed

date

Rosemont Ridge Middle School Seventh Grade Leadership Class:

Will fold and stuff envelopes as needed for the Alumni Committee as part of their Community Service obligations for this class.
